

Welcome to the new Mercury Supplier Portal!

We are excited to bring you our new **Mercury Supplier Portal**, a platform where suppliers can access Mercury's various supplier applications. Designed to provide convenient access to key information and accessibility across multiple devices (desktop, mobile and tablets), the new portal allows you to connect to:

- **iSupplier:** a secured site that allows suppliers to directly access information related to their business with Mercury (PO's, invoices, payments, remittance advice, contact information and business classifications). **The new Mercury Supplier Portal will replace our current iSupplier Home Page and iSupplier login on MercNet.**
- **EQMS:** a two-way communication system between suppliers and Mercury for Audits, Certifications, Supplier Corrective Action Requests, Deviations, Change Proposals, Scorecard, Applicable Supplier Documents – Supplier Guidelines, Mercury Routing Guide, etc.)
- **SCF RFx:** an application for Mercury distribution of direct material RFQ's and supplier submission of quotations

You can also view supplier communications and access quick links to supplier-related documentation and FAQs.

Suppliers will continue to log in to applications with their existing usernames and passwords. The new portal will **not** change your current supplier username and password.

Please take the time to explore this site. We hope you find it to be a beneficial communication tool between our organizations.

Thank you,

Karly Yuds
